### - Philosophy -

We aspire to be a company that is fully aware of the importance of environmental management by embracing the recognition that global environmental preservation is a critical issue for both the survival of humanity and ensuring the perpetual prosperity and sustainability of enterprise.

### - Policy -

As a company that contributes to the development of global science and technology with X-ray diffractometers, X-ray fluorescence spectrometers, thermal analysis instruments, semiconductor process evaluation equipment, etc., Rigaku Corporation, Rigaku Yamanashi Corporation, and Rigaku Logistics Corporation seek to achieve continual improvement and to prevent environmental pollution in accordance with the following policy:

1. In our business activities, we will implement continual improvement activities to reduce environmental burdens and safeguard the global environment.
2. We will seek to ensure environmental conservation in compliance with environmental laws, regulations, agreements, internal rules, etc.
3. We will contribute to environmental conservation by accurately identifying technologies, materials and manufacturing processes that help safeguard the global environment, and by developing and designing products that support them.
4. In our business activities, we will pursue the following key concepts for environmental management:
  - 1) Raising awareness of the importance of reducing environmental impact.
  - 2) Promoting energy usage reduction.
5. To implement this policy, we will ensure that all employees are aware of and understand environmental activities and information as well as raise their awareness of the importance of environmental issues.
6. We will cooperate with local communities to implement environmental improvements and publish this environmental policy if requested to do so by people inside or outside of the company.
